EDIT FIRST. CHOOSE AT DOWNLOAD.

## Your work comes first.

Editing and previews are available before purchase. A subscription is required only when the finished download includes a premium change. Free-tool downloads stay free and receive no Folio watermark.

**The trial is a paid introductory offer.** Pay \$1 USD for seven days. It renews automatically at \$25 USD per month unless you cancel before the trial ends. Monthly storage becomes unlimited after the first monthly payment is confirmed.

## 01 / AT A GLANCE

# The right tools.

## *The right amount of space.*

Both paid options include the same core Pro download features. Their price, billing period and storage allowance differ.

| Feature                                    | Free                  | 7-day trial  | Monthly                |
|--------------------------------------------|-----------------------|--------------|------------------------|
| Price                                      | \$0                   | \$1 / 7 days | \$25 / month           |
| Private cloud storage                      | 100 MB                | 1 GB         | Unlimited <sup>1</sup> |

| Download password-protected PDFs           | Plan required         | Included     | Included               |
| Saved library & account settings           | Included <sup>3</sup> | Included     | Included               |
| Billing portal & subscription management   | Not applicable        | Included     | Included               |

1. Unlimited means no total storage or saved-file-count quota while a verified monthly subscription remains active. Per-file and processing limits still apply.

2. Opening Edit Text or selecting a text block does not turn a free download into a paid one. A premium change must remain in the finished document.

3. Guests have a dashboard tied to their browser, with files expiring after 24 hours. Sign in to keep files in your account and access them across devices.

Translation and Office conversion depend on tool availability. They are not part of the core feature promises in this guide. See page 4 before buying for those workflows.

## 02 / THE EVERYDAY PLAN

# Useful from *the first document.*

Folio Free includes everyday PDF editing and document utilities, with no subscription required for their finished downloads.

01

## Annotate, sign & fill

- Add new text, highlights and annotations.
- Place images and draw on a page.
- Draw, type or upload a visual signature.
- Fill forms and create fillable fields.

Adding a text box is different from replacing the original PDF text.

02

## Organize your PDF

- Merge files or split out selected pages.
- Compress PDFs and adjust page crops.
- Rotate, reorder, duplicate or delete pages.
- Add watermarks and page numbers.

Compression results depend on the source document; some files may not shrink.

03

## Convert & extract

- Export PDF pages as JPG or PNG.
- Extract text that is already selectable.
- Turn JPG, PNG or WEBP images into PDF pages.
- Combine mixed images in one PDF.

Text extraction does not recognize scanned or photographed text.

04

## Images & QR codes

- Convert JPG to WEBP or WEBP to JPG.
- Compress JPG, PNG and WEBP images.
- Adjust brightness, color and sharpness.
- Create static QR codes as PNG or SVG.

Photo adjustments do not reconstruct missing detail or add AI super-resolution.

### Continue as a guest

Use the dashboard and 100 MB of private cloud storage in your current browser. Files expire 24 hours after upload. Clearing the browser's session data can remove access.

### Sign in with Google

Keep the same 100 MB free allowance, retain account files beyond the guest expiry and access them across devices. Paid checkout and billing management require sign-in.

Good fit for: everyday paperwork, adding notes, signing a form, combining receipts or converting a PDF page to an image.

## 03 / PREMIUM DOWNLOADS

# Change the original.

## *Keep control of the result.*

The paid trial and monthly subscription unlock the same core Pro features. You can inspect and preview these changes before choosing a plan.

## CORE PRO FEATURE

## Edit the PDF's original text

Replace or delete supported PDF text objects directly on the page. Move or copy an edited original-text block, adjust replacement fonts, size and color, and use find-and-replace across the document.

**Example:** Correct a name or amount already printed in a PDF, review the result, then use your active plan to download the changed document.

Text editing works one block at a time; paragraphs do not automatically reflow. Supported embedded fonts, weight and color are preserved where possible. Missing characters may use a matching fallback. Scans and outlined letters are not ordinary editable text.

## CORE PRO FEATURE

## Password protection

Create a password-protected PDF using AES-256 encryption. Set an opening password and review the settings before exporting. The protected download requires an active paid plan.

Opening passwords are not saved with your workspace. Keep the password somewhere you can retrieve it.

**Mixed edits are handled at download.** A document with free annotations and original-text changes requires Pro to export. Undo all original-text changes to return to a free annotation-only download. A visual signature alone remains free.

### Check availability before choosing Pro for another tool

PDF translation and PDF-to-Word, Excel or PowerPoint conversion require connected document services and are excluded from this guide's core package promises. Check the individual tool page before buying for these workflows.

Standalone OCR, RTF/EPUB conversion, reverse Office conversion, transcription and audio/video conversion are planned capabilities, not available features included here.

Deleting a text object is not secure redaction. Visual signatures do not include a digital signing certificate.

## 04 / SPACE THAT FITS YOUR WORK

# More storage.

## *Clear working limits.*

Storage capacity and document-processing limits are separate. A larger storage plan does not increase the maximum size of an individual file.

| FREE / GUEST         | PAID TRIAL           | PAID MONTHLY              |
|----------------------|----------------------|---------------------------|
| <b>100 MB</b>        | <b>1 GB</b>          | <b>Unlimited</b>          |
| Up to 200 saved PDFs | Up to 200 saved PDFs | No saved-file-count quota |

| Workflow                                    | Current limit                                                            |
|---------------------------------------------|--------------------------------------------------------------------------|
| Cloud library / main editor upload          | Up to 50 MB per PDF                                                      |
| Original-text editing & password protection | Up to 10 MB and 100 pages per file                                       |
| Premium download requests                   | 20 per minute; 500 per day                                               |
| Image and standard batch tools              | Up to 20 files; 50 MB each; 150 MB combined, where batching is supported |
| Guest file availability                     | 24 hours after upload, tied to the browser session                       |

### When your space fills up

Uploads and saves that exceed the allowance are blocked. Delete old cloud files to free space, or choose an eligible paid plan. Source PDFs, saved workspaces and recovery data can all contribute to usage.

### After the trial

The 1 GB allowance becomes unlimited after the first monthly payment is confirmed. If paid access ends, the account returns to its free allowance; being over that allowance can prevent new uploads.

## Private saving, with clear controls.

The main editor uploads PDFs and saves changes to private cloud storage for refresh recovery. Guests use a browser-bound session; signed-in users use their account. Wait for "All changes saved" before closing or refreshing.

Many standalone free tools process locally in the browser. Original-text editing and protection also use server processing. Delete saved files through your dashboard; downloaded copies remain wherever you saved them.

Unlimited storage applies to an active, verified monthly subscription. It does not mean unlimited file size, processing speed or download requests. Each tool's displayed limits still apply.

## 05 / KNOW WHAT HAPPENS NEXT

# Simple billing.

## *No surprises at renewal.*

All prices are in US dollars. Review the final amount, any applicable taxes and the renewal date shown at checkout before confirming your purchase.

1

**Start the paid trial – \$1 USD**

Your seven-day introductory period starts when checkout creates your subscription. It includes Pro features and 1 GB of private storage. Available once per account.

2

**Continue after seven days – \$25 USD/month**

The subscription renews automatically unless you cancel before the trial ends. Unlimited storage starts after the first monthly payment is confirmed.

3

**Or choose monthly immediately – \$25 USD/month**

Skip the introductory period. Monthly billing starts straight away, with Pro features and unlimited storage after payment confirmation.

**Manage or cancel**

Open **Dashboard** → **Billing** → **Manage billing** to use the Lemon Squeezy portal. Cancel before your next renewal to avoid the next charge. End-of-period cancellation keeps access through the paid period.

**Payments & activation**

Lemon Squeezy hosts checkout and shows available payment methods. Folio does not collect card numbers. Access depends on confirmed payment; failed or unpaid renewals do not grant another paid period.

**Will signing in interrupt my editing?**

Sign-in and checkout can open in a new tab while the editor stays open. Let the document finish saving before switching away. After payment, return to the editor and check your access to download.

**Do I need Pro for every document?**

No. Use free tools and free editor changes without a subscription. Choose Pro when the finished file contains original-text edits or password protection.

READY WHEN YOU ARE
